OSAYAME EGHOSA

Data Engineer | SQL · Python · GCP / Azure / AWS | Remote

Abuja, Nigeria (WAT, UTC+1) • +234 912 262 2586 • eghosa.osayame@yahoo.com

LinkedIn • Portfolio • GitHub • **Remote-ready: 2+ years fully remote, async-first, overlaps EU & US-East hours**

PROFESSIONAL SUMMARY

Data Engineer with 5+ years in data, currently building and running production ELT pipelines end to end on Google Cloud, Azure and AWS. I ingest structured, semi-structured and unstructured data, model it through staging, intermediate and mart layers, and own data quality (validation frameworks, transformation audits). Daily tools: advanced SQL, Python, Git, Docker and Kubernetes. Certified Azure Data Engineer, Fabric Data Engineer and KCNA. I've worked fully remote for 2.5+ years and communicate in writing by default.

SKILLS

- **Pipelines:** ETL/ELT design, build and operation; multi-source ingestion; orchestration; Azure Data Factory, AWS Glue
- **SQL & storage:** advanced SQL, PostgreSQL, BigQuery-style warehouses, Synapse, Redshift, dimensional modelling, query tuning
- **Programming:** Python (pandas, NumPy), R, Git / GitHub, CI/CD
- **Platform:** Docker, Kubernetes (KCNA), Google Cloud, Azure, AWS
- **Data quality:** validation frameworks, transformation audits, standardisation, documentation

PROFESSIONAL EXPERIENCE

Analytics / Data Engineer — Data2Bots *Nov 2025 – Present*

- Design, build and run ELT pipelines on Google Cloud, Azure and AWS, turning multi-source data into analytics-ready layers.
- Build layered models (staging → intermediate → mart) powering BI dashboards and executive reporting.
- Lead data quality: validation frameworks, transformation audits and standardisation across enterprise datasets.
- Process a large scraped job-listing dataset to identify Nigerian Azure users for business development.
- Translate product and analytics requirements into data solutions; document pipelines in Confluence and Miro.

Database Engineer & BI Officer — Havosoft *Feb 2025 – Nov 2025*

- Designed and maintained ETL pipelines integrating diverse sources, enforcing quality standards.
- Maintained and modelled large, complex datasets; built executive reporting on top.

Data Analyst (Remote) — Mustard Insights *Nov 2021 – Apr 2024*

- Extracted, cleaned and modelled large datasets with SQL and Python; automated dashboards and recurring reporting.

Data Instructor — Poshem Technologies (Remote) & Abuja Data School *Apr 2024 – Feb 2025*

- Taught SQL, Python, R, Power BI and data modelling to remote learners across Africa; guided end-to-end pipeline projects.
- Led a hands-on Power BI workshop for M&E professionals at the Data Analytics & AI Conference 1.0.

Graduate Intern (NYSC) — National Agency for the Control of AIDS (NACA) *Apr 2021 – Feb 2022*

- Collected, cleaned and visualised national public health programme data; built dashboards tracking campaign performance and health outcomes.

PROJECTS

- **End-to-end Microsoft Fabric project:** Data Factory ingestion → Synapse transformation → Python sentiment analysis → Power BI. View project
- **SQL transformation & monitoring:** automated SQL transformation workflows with Tableau dashboards tracking system metrics.
- **Code:** pipelines and SQL on GitHub.

EDUCATION

BSc Biochemistry — *Landmark University, Kwara State* *2016 – 2020*

CERTIFICATIONS

- Microsoft Certified: Azure Data Engineer Associate
- Microsoft Certified: Fabric Data Engineer Associate
- KCNA: Kubernetes and Cloud Native Associate
- Microsoft Certified: Azure AI SQL Developer Associate (DP-800)
- AWS Certified Cloud Practitioner (2025)
- Microsoft Certified: Azure Administrator Associate
- Microsoft Certified: Fabric Analytics Engineer Associate
- Google Data Analytics Professional Certificate
